VOLUME CV

INDEX

1965

A

ABJ staff in 1937—367
Acarine disease research—259
Adansonii bee—324
Air bubbles in honey—339
Air operated tools—292, 427
Alarm communication of bees—206
Alder aphid epidemic—101
Alphandery, Georges—425
American Beekeeping Federation—
  Adee, E. H., program chm. 181
  new emblem—182
  officers for 1965—102
  Robinson, Earl, membership chm.—224
Am. Bkg. Fed. Auxiliary—266
American foulbrood—63, 223, 291
Am. Honey Inst. reorganized—341, 364, 381, 423, 459
Ammonium nitrate—305
Anderson, Prof. E. J., retires—167
Animals molest beeyards—219
Ant control—339
Antibiotics—
  tetracycline, new drug—207
  treatments for disease—88, 176, 207, 223
  tyrosin, new drug—223
Apicultural Abstracts—244, 328, 404
Apiculture at Ohio Univ.—450
Apiculture class—142
Apiculture research in Canada—286, 423
Apiculturist, Extension—44
Apidictor—56
Apple yields improved—96
Arboretum, Morton—411
Around the Bee Yard—98, 219
Artificial lights with bees—213
Ashursts in pollination business—12
Australian Honey Board—336
Australian honey research—8

B

Banker's trip to Romania—136
Bats get nectar from plants—93
Bee Industries Ass'n.—303, 305
Bee law in Nebraska—308
Bee literature—416
Bee repellent—137
Bee Research Ass'n. (Eng)—244, 328, 404
Bee trees—261
Bee World—244, 328, 404
Beehive invaders—410
Beekeeper of the year—331
Beekeeping—
  getting interesting in—9, 90
  history of Kentucky—18
  in Brazil—212
  in Cyprus—61
  in Mexico—38
  in Romania—136, 214, 299
  in Tanzania, Africa—358
  records—267
  success, what is needed—128
  starting—63
  systems—215
  tools—292
  widows have their day—94
Bees—
  Adansonii of Brazil—324
  controlled by electronics—56
  Cyprian—61
  eat so much—134
  increase squash yields—52
  killed by spraying—138
  moving—8, 288
  on view the year around—452
  or silkworms—207
  packages—132
  pollinate trefoil—50
  taken to Cuba in 1903—16
  used in warfare—14
Beeswax molding—383
Beginning with bees—132, 170, 210, 249, 291, 232
Benzaldehyde for removal of bees—178, 250
Birds, bees and flowers—297
Books—
  History of National Beekeepers' Organizations, by V. G. Milum—143, 303
  Manual for an easy method of managing bees, by John M. Weeks, (1836)—329, 371
  Pests of Field Crops, by F.G.W. and Margaret Jones—58
  World of Bees, by Murray Hoyt—303
Bottom boards, preserving—179
Break-even point for honey—46
Bumblebee honey—174
Burleson, Edward, heads Check-off sales—417
Byrd's (Sen.) apple orchard—290

C

Cale, Sr., G. H.—364, 366
Cage, queen nursery—415
Cages used in pollination—378
Canadian colonies, number of—303
Canadian honey and syrup—17
Canadian research on diseases—286
Caucasian bees withstand winters—209
Candlemaker, Charlie Going—456
Cell building explained—172
Cell size governs weight of worker—86
Centennial of Mich. Bkrs. Ass'n—143
Check-off participants—21
Check-off plan—4, 164, 204, 248, 284, 364, 417
Christmas cards—379, 389
Class in apiculture—142
Collectors' items—369
Colonies dead of unknown cause—48
Colonies, uniting—462
Colony management—90
Comb honey has 150th anniversary—53
Comb honey management—210, 249, 383
Comunication of bees in hive—206
Condition determined before opening hive—54
Congressmen, advice on writing to—251
Contest—baking with honey—139
Correction of article—118
Correspondence course, beekeeping—23
Correspondence course on marketing—225
Correspondence course on nut production—267
Crane, Dr. Eva—238, 328
Creosote to preserve bottom boards—179
Crop and Market—38, 78, 118, 158, 198, 238, 278, 318, 358, 398, 438, 478
Crystallization of syrup, to prevent—23
Cyprian bee—61

D

Dadant's hybrid program—300
Devices to aid beekeepers—213
Diagram of new bee feeder—412
D.I.A.P. monotoring program—89
Disease—
  Acarine—259
  AFB—63, 223
  briefs—223, 368
  European—291
  examining for—291
  law in Iowa—289
  Nosema—246, 286, 291, 370
  rate in Mich. low—144
Drifting of drones—175
Drones, use of—376
Drugs, warning—88
Drums for shipping honey—258
Dyce process for creamed honey—305

E

EAS ten years old—260
Editorial—
  Jan.—Honey and Dr. Jarvis' books—Support your industry—4
  Feb.—Why a Federal Extension Apiculturist? by W. A. Stephens—44
  Apr.—What's ahead for beekeepers—124
  May—After Atlanta—The industry outlook—164
  June—A new departure for the industry check-off—204
  July—Bee Research Association deserves your support—244
  Aug.—High time for action—284
  Sept.—Precautions in promoting the sale of honey—324
  Oct.—Wishful thinking—From Federation Newsletter—364
  Nov.—Bee Research—404
  Dec.—New system of weights and measures, Storing chemicals, Chattanooga meeting—444
Egg-graft method in Hungary—168
Eight-frame equipment—135
Electronic control of bees—56
Emblem of ABF—182
Equipment, cleaning—305, 426
Equipment, use for 8-fr.—135
European disease—291
Experimental Farm, Canada—286
Extracting crystallized honey—462
Extracted honey management for—210, 249
Extractor, new solar—303
Extractor, Powers—176
Eye, compound, of the bee—172

F

Fall management and wintering—332
Farmers need hives of bees—179
Fed. Ext. leader appointed—223
Feeder, new—412
Feeding bees—15, 305
Feminine Monarchie—454
Flies resembling bees—255
Flood at Dadant factories—221
Food fair in England—143
Foulbrood treatment with 6⅔ supers—215
Four-H Club—139, 407
Fumigation tips—372, 398

G

Gamma radiation—286
Garner, J. F.—408
German beekeeping literature—293
Giordani, Dr. Giulia, visits U.S.—259
Girl becomes beekeeper—60
Going, Charlie, candlemaker—456
Grace, Mrs. Harriett retires—66
Grant to Poland by USDA—218
Graph for determining break-even point—46
Gregarine spores—10, 374

H

Hambleton, J. I., at Int. Congress—348
Hankammer apiary in winter—5
Hansen, Henry—Iowa beekeeper—226
Haydak, M. H., honored—329
Haydak on bee research in Australia—52
Hilbert's beekeeping in Cuba—16
Hive—
  measurement—178
  number six—59
  of comb honey—99
  side entrance—172
  temperature in summer—139
Hives for migration in Romania—453
Hives per acre in pollination—15
Hobbyist in beekeeping—208
Honey—
  Am. at British exhibition—225
  and pectin in jelly—62
  ask for, in restaurants—296
  creamed—178, 305
  crop in Canada 387, 457
  crop in Italy—307
  dishes, collecting—369
  exports in Argentina—293
  exports in Spain—293
  exports in U.S.—293, 302
  facial mask—342
  for breakfast week—141
  for gymnastic team—330
  industry outlook—164
  in the Apple Box—252
  is a food—254
  loans—343
  packers, Rocke Bros.—256
  pouring from 60-lb. can—95
  production break-even point—46
  production report—106, 429
  production workshop by USDA—213
  Queen's report—340
  removing crop—249
  requirements in working with—254
  research (USA)—47, 225, 303
  research (Australia)—8
  tanks used by Ralph Stone—220
  used in making jelly—304
Honey Market News monthly basis—348
Honey market, world—218, 253, 302, 339, 380, 418
Honey plants—
  Anise hyssop—87
  Bee Bee tree—216, 383
  Birdsfoot trefoil—50, 334
  Borage—130
  Buckthorn—414
  Butterfly weed—414
  Chivirico—130, 383, 414

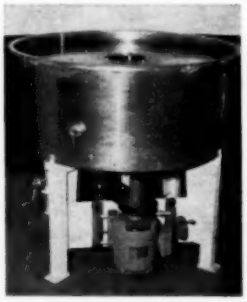
The Sensational New
Spin-Float Honey-Wax Separator



This machine separates honey from wax. Honey and wax mixture fed into this machine continuously, is separated and removed continuously.

Some of the advantages of this machine

- Negligible honey loss in wax
- Wax melts easier being honey free
- Extra honey saved and put in tank by having cappings dry
- Honey will be clean
- No messy job of dipping and carrying wet cappings
- Increases extracting capacity, need less super storage
- No discoloration of honey because of low temperature needed for clarification
- A time and labor saver
